

THANK YOU!

FOR RECOGNIZING

AS THE BEST DEALERSHIP AND ONE OF THE BEST BODY SHOPS IN 2009

Here's Big News From Berthod Motors

GM and Chrysler have re-affirmed Berthod Motors as their dealer for our market area. Our proven ability to take care of our customers has resulted in a new mandate from Jeep, GMC, Buick and Pontiac. We are being encouraged to keep the customers we have and grow our business.

Jeep sales are continuing at a brisk pace and many models have very good customer incentives, up to \$6,000 savings on some models. Shop now while the selection is good.

Pontiac is being phased out as part of the GM restructuring. Though we are sad that a true American icon is going away after 2010, we are pleased to offer big incentives on the Pontiacs we have. Remember, the parts, warranty and service will be honored for many years to come.

Buick continues to set quality standards for the industry. Buick tied for the J.D. Powers Top Quality Spot in this year's customer survey. The new Buick Enclave all-wheel drive luxury crossover SUV is finding its spot in homes up and down the Roaring Fork Valley. It has great Cadillac power and best-in-class gas mileage at 24 m.p.g. on the highway. We are awaiting the new Buick LaCrosse with all-wheel drive. Lexus, Mercedes, BMW and Audi now have an all American quality contender.

GMC continues to make what buyers want. We have a good selection of GMC Denali and Yukon models in stock. The Yukon Hybrid is in stock and gets 24 m.p.g. It also is a capable tow vehicle due to its 6.0 liter variable displacement engine.

The business and commercial operators in the valley can find almost any kind of work truck or van in our inventory. We have GMC Canyon economy pickups and 4500 diesel trailer haulers and everything in between. We also have 4x4 15 passenger vans for a crew or hotel transfer vehicle.

We at Berthod Motors have been committed to excellence for over 65 years, not just in the showroom but in our community as well. We look forward to being your choice in the future as we adapt to our ever-changing industry.
